

An Important Message from CWA

**We support health care reform —
but taxing our benefits
isn't the way to pay for it.**

The U.S. Senate is threatening to pass a health care reform plan that would **tax our health care benefits!** This plan would force AT&T to cut benefits and shift costs to workers and retirees to avoid this tax.

Average ANNUAL TAX on AT&T West Health Plans:

- \$3,000** for workers with families
 - \$1,200** for single workers
 - \$2,000** for early retirees with families
 - \$1,000** for single early retirees
-

President Obama promised health care reform that lets us keep our health care benefits. CWA supports that plan, and the Senate should too.

There's a better way. All employers should cover their workers and the wealthy should pay their fair share too.

Call your Senators today! 1-888-580-0792

Tell them: Taxing health benefits is not health care reform!
